Section I - Presentations and Discussions at Plenary Sessions

Introduction and Overview of Workshop Objectives	3
Plenary Session Presentations	
Cynthia Decker. The Census of Marine Life: An update on activities	5
Julian P. McCreary, Jr. Decadal climate variability in the Pacific Ocean, and theories as to its cause	9
Warren S. Wooster. Comments on LMR-GOOS recommendations	14
Kees Zwanenburg. Background and objectives of POGO	17
Kees Zwanenburg. Plans for a CoML Workshop on Canadian Marine Biodiversity: Pacific, Arctic, and Atlantic	19
David W. Welch. An appraisal of current Pacific Ocean monitoring efforts existing within PICES countries	22
David W. Welch. Census of Marine Life - POST (Pacific Ocean Salmon Tagging) proposal	23
Reports of the Breakout Group Discussions	
Breakout Group 1: Physical/Chemical Oceanography and Climate	25
Breakout Group 2: Phytoplankton, Zooplankton, Micronekton and Benthos	31
Breakout Group 3: Fish, Squid, Crabs and Shrimps	36
Breakout Group 4: Highly Migratory Fishes, Seabirds and Marine Mammals	38
Closing Plenary Discussion and Recommendations	41

Section II - Extended Abstracts of Individual Presentations at Breakout Group Sessions

Breakout Group 1: Physical/Chemical Oceanography and Climate

Steven J. Bograd. CalCOFI hydrographic climatology	47
Lynn deWitt and Roy Mendelssohn. Improving access to environmental datasets: Data holdings at Pacific Fisheries Environmental Laboratory	49
Kimio Hanawa. Japanese repeat hydrographic lines in the North Pacific	54
Andrei S. Krovnin, Gennady V. Khen, Elena Ustinova and Marat Bogdanov. Monitoring of climatic variations in Far Eastern Seas	57
Vyacheslav B. Lobanov. On time-series observation programs in the northwestern Pacific in Russia	62
S. Allen Macklin. Physical and biophysical time-series originating from or used by Fisheries Oceanography Coordinated Investigations (FOCI) in the North Pacific Ocean and Bering Sea	64
James E. Overland. Gridded atmospheric re-analysis fields	74

Fangli Qiao. Research on the physical-biological-chemical coupled numerical model in China	75
---	----

Breakout Group 2: Phytoplankton, Zooplankton, Micronekton and Benthos

Hal Batchelder. U.S. GLOBEC Northeast Pacific Program: Observations, retrospective studies and model products	79
Sonia D. Batten and David W. Welch. The Continuous Plankton Recorder survey of the North Pacific	84
Richard D. Brodeur. Micronekton data sets in North Pacific	86
David M. Checkley, Jr. Zooplankton in the California Cooperative Oceanic Fisheries Investigations	90
Sanae Chiba. Japan Sea time-series: Qualitative study on lower trophic level ecosystem may reveal the process on climate-ecosystem interaction	93
Rita Horner. Phytoplankton data from the Gulf of Alaska, British Columbia and the Pacific coast of the U.S., with emphasis on harmful algal bloom species	96
Shin-ichi Ito. Physical and lower-trophic level data time-series in the Mixed Water Region	107
Young-Shil Kang. Monitoring system and long-term trend of zooplankton in the Korean waters	111
Toru Kobari and Tsutomu Ikeda. 180° longitude - Oceanographic time-series information	114
Carina Lange. Phytoplankton time-series in the California Current	118
David L. Mackas. Canadian activities and plans for zooplankton, phytoplankton, micronekton, and benthos monitoring in the Pacific Ocean	122
William T. Peterson, Julie Keister, Leah Feinberg and Cheryl Morgan. Monitoring of coastal pelagic ecosystems off Oregon, Washington and N. California - Hydrographic and plankton time-series	125
Sei-ichi Saitoh and Kosei Sasaoka. East-west variability of primary production in the subarctic North Pacific derived from Multi-Sensor Remote Sensing during 1996-2000	129
Kazuaki Tadokoro. Long-term variations of plankton biomass in the North Pacific	132

Breakout Group 3: Fish, Squid, Crabs and Shrimps

Kerim Aydin. North Pacific multispecies and ecosystem models of the Alaska Fisheries Science Center (and selected others)	137
Steven R. Hare. Life history of Pacific halibut (<i>Hippoglossus stenolepis</i>)	144
Steven R. Hare. Biological and physical environment databases of the International Pacific Halibut Commission	146
Suam Kim. Fishery data of the Republic of Korea	149
Victor V. Lapko. TINRO's time-series data on Russian fish and ecosystems	151
Patricia Livingston and Anne B. Hollowed. Groundfish, crab, shrimp and other time-series of the Alaska Fisheries Science Center	152

Gordon A. McFarlane. Groundfish and pelagic time-series maintained by the Stock Assessment Division of Fisheries and Oceans, Canada	155
Bernard A. Megrey. FOCI biological time-series available for use as ecosystem indicators from the Fisheries Oceanography Coordinated Investigation	158
H. Geoffrey Moser. The California Cooperative Oceanic Fisheries Investigations ichthyoplankton time-series	164
Yasunori Sakurai. Long-term monitoring of subarctic North Pacific ecosystems by the T/S <i>Oshoro Maru</i> and <i>Hokusei Maru</i> (Hokkaido University): The present and the future	170
Qi-Sheng Tang and Xian-Shi Jin. Time-series information in the Yellow Sea and Bohai Sea	172
Akihiko Yatsu, Hiroshi Nishida, Minoru Ishida, Akira Tomosada, Takahiro Kinoshita and Tokio Wada. Trajectories of catch and stock abundance of dominant small pelagic fishes and common squid with some related environmental indices around Japan	175
Breakout Group 4: Highly Migratory Fishes, Seabirds and Marine Mammals	
Douglas F. Bertram. Seabirds reflect changes in ocean climate	179
Hidehiro Kato. Assessment of feeding impact by higher trophic predators	182
Phillip R. Mundy, Cherri Womac and Carrie Holba. Data summary: Impact of climate variability on observation and prediction of ecosystem and biodiversity changes in the North Pacific	183
Robert Olson. Yellowfin, bigeye, skipjack, bluefin, and albacore tunas in the Eastern Pacific Ocean	184
Jeffrey J. Polovina. Biological time-series for the central North Pacific	197
Hiroshi Ueda, Masahide Kaeriyama and Shigehiko Urawa. Recent progress in salmon migration research in Japan	199
Yutaka Watanuki. Seabird monitoring program at Teuri Island, Hokkaido, Japan	201
Appendix 1. Workshop agenda	203
Appendix 2. List of participants	205
